

# MUHAMAD IBNU ROUSHUL

Full Stack Web Developer

ibnurousul1@gmail.com | 081285544953 | Tangerang, Banten

## EDUCATION

**Pamulang University**  
Computer Science Bachelors  
GPA: 3.34

Tangerang Selatan, Banten  
August 2018 - August 2022

## EXPERIENCE

**PT. Dana Purna Investama | Operational Support Staff** Jakarta, DKI Jakarta | April 2018 - March 2021

- Ensured accurate preparation and delivery of items requested by customers to maintain efficient logistics.
- Organized and archived Teller and Customer Service (CSO) documents systematically to support smooth operations.
- Assisted with document duplication for CSO and Teller teams to expedite workflow.
- Regularly provided stock updates to Teller and CSO teams, ensuring alignment between physical and system inventories.
- Guided customers in using E-Service and Star Teller machines to enhance their service experience.

**PT. Nata Connexindo Digital | Back End Web Developer** Tangerang, Banten | February 2023 - July 2023

- Collaborated with front-end teams to ensure effective integration of back-end functionalities with user-facing interfaces.
- Developed and maintained web forms, menus, and features using ASP.NET framework to ensure seamless functionality and user interaction.
- Designed and optimized relational database structures, performing data manipulation and establishing efficient table relationships to support web applications.
- Diagnosed and resolved bugs or performance issues in ASP.NET applications, ensuring smooth and reliable operations.
- Conducted thorough testing and debugging of forms and server-side functionalities to guarantee error-free performance.
- Implemented updates, feature enhancements, and performance optimizations for ASP.NET-based websites to align with business requirements.

**PT. Pajajaran International Cold Storage | Refrigeration Machine Operator** Tangerang, Banten | July 2023 - September 2024

- Maintained and monitored refrigeration machines, including pressure levels and electrical panels, to ensure optimal performance.
- Conducted regular checks on remaining electricity (kWh) and managed the purchase of electricity tokens to support operations.
- Recorded and reviewed temperature data logger readings in all rooms to maintain storage quality.
- Input and updated cargo status data, including inbound and outbound cargo, into the import warehouse system for accurate records.
